Activity No: 6.1	
Activity Title: Basic Functions	
Course Code: CPE 007	**Program:** Computer Engineering
Course Title: Programming and Logic Design	**Date Performed:** 09/8/26
Section: CPE11S2	**Date Submitted:** 09/8/26
Name(s): Turbela, Summer Shane M.	**Instructor:** Sir. Noel Jason Lusung

Objectives

This activity aims to develop programming skills using functions.

Instructions

1. 2.1 Create a program in C++ that will add, subtract, divide, multiply for a 2 user-input integer values. Use functions in the program.
2. 2.2 Create a program in C++ that will convert a user-input Farenheight to Celcius and vice versa. Use functions in the program.
3. 2.3 Create a program in C++ that will convert dollars into pesos and vice versa. Use functions in the program.

Output/Answer

ACTIVITY 1:

```
#include <iostream>
#include <iomanip>
using namespace std;

//Creates functions for the 4 common arithmetic operations
   int add (int i, int j) {
      return i + j;
   }
   int subtract (int i, int j){
      return i - j;
   }
   int multiply (int i, int j){
      return i * j;
   }
   int divide (int i, int j){
      return i/j;
   }

int main(){
   double a, b;

//Lets users input the first variable (number) and the second.
   cout << "(1) Enter a number from your keyboard: ";
   cin >> a;
   cout << "(2) Enter a number from your keyboard: ";
   cin >> b;

//Directly outputs and calculates in every operations
   cout << "1. Addition: " << add(a,b) << endl;
   cout << "2. Substraction: " << subtract(a,b) << endl;
```

```
    cout << "3. Multiplication: " << multiply(a,b) << endl;
    cout << "4. Division: " << divide(a,b) << endl;
}
Return 0;
}
```

Output

```
(1) Enter a number from your keyboard: 10
(2) Enter a number from your keyboard: 13
1. Addition: 23
2. Substraction: -3
3. Multiplication: 130
4. Division: 0
```

ACTIVITY 2

```
#include <iostream>
#include <iomanip>
using namespace std;

//initializes variables inside main function
int main() {
int option;
int celsius;
int fahrenheit;
double celsius1, fahrenheit1;
    cout << fixed << setprecision(2);

//gives users options to choose from whether they want to convert to Fahrenheit or Celsius
cout << "1. Celsius to Fahrenheit \n";
cout << "2. Fahrenheit to Celsius \n";
cout << "Choose a number: ";
cin >> option;

//uses if statements for each option given that'll depend on the user and calculates if it's option 1, else, it returns to option
2.
if (option == 1) {
cout << "\nEnter Celsius: ";
cin >> celsius;
fahrenheit1 = (celsius * 9/5) + 32;
cout << celsius << "C" << " is " << fahrenheit1 << "F" << " in Fahrenheit\n";
}
else (option == 2); {
cout << "\nEnter Fahrenheit: ";
```

```
cin >> fahrenheit;
celsius1 = (fahrenheit - 32) * 5/9;
cout << fahrenheit << "F" << " is " << celsius1 << "C" << "in Celsius\n";
}
   return 0;

   }
```

Output

```
1. Celsius to Fahrenheit
2. Fahrenheit to Celsius
Choose a number: 1

Enter Celsius: 10
10C is 50.00F in Fahrenheit

Enter Fahrenheit:
```

ACTIVITY 3:

```
#include <iostream>
#include <iomanip>
using namespace std;

//initialize values/variables inside the main function
int main() {
int option;
int dollar;
int peso;
double dollar1, peso1;
   cout << fixed << setprecision(3);

//Lets users know what to input by choosing an option first
cout << "1. Dollar to Peso \n";
cout << "2. Peso to Dollar \n";
cout << "Choose a number: ";
cin >> option;
if (option == 1) {
cout << "\nEnter Dollars Currency: ";
cin >> dollar;

//Converts dollars to the equivalent amount of pesos
peso1 = dollar * 63.01;
cout << dollar << " Dollars" << " is " << peso1 << " Php" << endl;
}
//Concerts peso to the equivalent amount of dollars
```

```
else (option == 2); {
cout << "\nEnter Peso Currency: ";
cin >> peso;
dollar1 = peso * 0.016;
cout << peso << " Peso" << " is " << dollar1 << " Dollars:" << endl;
}
   return 0;

   }
```

Output

```
1. Dollar to Peso
2. Peso to Dollar
Choose a number: 1

Enter Dollars Currency: 10
10 Dollars is 630.100 Php

Enter Peso Currency: 13
13 Peso is 0.208 Dollars:
```

Supplementary Activity (if any)

N/A

Conclusion

- I've understood the common concepts of functions, I've learnt about this way before because it is basically used in every old projects that were given.

Assessment Rubric: SO 7

Rubric for SO 7 (6)

Criteria	Ratings						Pts
SO 7 PI 1 IILO4 Utilize lifelong learning skills in pursuit of personal development and excellence in professional practice. threshold: 4.8 pts	6 pts Excellent | Educational interests and pursuits exist and flourish outside classroom requirements,knowledge and/or experiences are pursued independently and applies knowledge learned into practice	5 pts Good | Educational interests and pursuits exist and flourish outside classroom requirements,knowledge and/or experiences are pursued independently	4 pts Satisfactory | Look beyond classroom requirements, showing interest in pursuing knowledge independently	3 pts Unsatisfactory | Begins to look beyond classroom requirements, showing interest in pursuing knowledge independently	2 pts Poor | Relies on classroom instruction only	1 pts Very Poor | No initiative or interest in acquiring new knowledge	6 pts
SO 7 PI 2 IILO4 Utilize lifelong learning skills in pursuit of personal development and excellence in professional practice. threshold: 4.8 pts	6 pts Excellent | Completes an assigned task independently and practices continuous improvement	5 pts Good | Completes an assigned task without supervision or guidance	4 pts Satisfactory | Requires minimal guidance to complete an assigned task	3 pts Unsatisfactory | Requires detailed or step-by-step instructions to complete a task	2 pts Poor | Shows little interest to complete a task independently	1 pts Very Poor | No interest to complete a task independently	6 pts
SO 7 PI 3 IILO4 Utilize lifelong learning skills in pursuit of personal development and excellence in professional practice. threshold: 4.8 pts	6 pts Excellent | Synthesizes and integrates information from a variety of sources; formulates a clear and precise perspective; draws appropriate conclusions	5 pts Good | Evaluate information from a variety of sources; formulates a clear and precise perspective.	4 pts Satisfactory | Analyze information from a variety of sources; formulates a clear and precise perspective.	3 pts Unsatisfactory | Apply the gathered information to formulate the problem	2 pts Poor | Gather and summarized the information from a variety of sources but failed to formulate the problem	1 pts Very Poor | Gather information from a variety of sources	6 pts
SO 7 PI 4 IILO4 Utilize lifelong learning skills in pursuit of personal development and excellence in professional practice. threshold: 4.8 pts	6 pts Excellent | Ideas are combined in original and creative ways in line with the new and emerging technology trends to solve a problem or address an issue.	5 pts Good | Ideas are creative and adapt the new knowledge to solve a problem or address an issue	4 pts Satisfactory | Ideas are creative in solving a problem, or address an issue	3 pts Unsatisfactory | Shows some creative ways to solve the problem	2 pts Poor | Shows initiative and attempt to develop creative ideas to solve the problem	1 pts Very Poor | Ideas are copied or restated from the sources consulted	6 pts

Total Points: 24
